## PROJECTS

[LearnLocker](#)

React (functional components only) | CSS in JS | PostgreSQL | ExpressJS | Socket.IO

A web application that allows web developers to save and organize learning resources(articles, books, podcasts, videos) from all over the Internet in one place. ([Github](#))

[Xelp](#)

HTML | React | Ruby | CSS in JS | PostgreSQL

Web application that helps adults find, adult-friendly things to do in their city. Suggesting popular bars/breweries/wineries/venues in the area. ([Github](#))

[Allegiance](#)

React | CSS in JS | PostgreSQL | Node.js | Redis | Socket.IO

A fresh and engaging way for sports fans to meet and connect with other fans ([Github](#))

## BOOTCAMPS

**Lambda School**

Software Engineering Academy that provides an immersive (full-time, 40+hours/week) hands on curriculum with a focus on software engineering, and web-development. All of my assignments are forked repositories from LambdaSchool on my Github
